NATUREMILL AND WILLIAM SONOMA ANNOUNCE NEW CABINET KIT

Essential for Conveniently Composting in the Kitchen

San Francisco, CA, June 1, 2008 -- NatureMill, Inc. today unveiled a new product, the Cabinet Kit available exclusively at Williams-Sonoma. Specifically designed for urban users, it saves space allowing the NatureMill to be easily installed in a standard kitchen cabinet for ease of indoor composting. The cabinet kit is a premium accessory for the NatureMill composter.

"We've listened to our customers, who tell us they don't have enough room in their crowded apartment kitchens," says Russ Cohn, president of NatureMill. "The cabinet kit solves this problem by fitting into an existing cabinet."

NatureMill is the leader in automatic home composting. We invented a clever machine (patent pending) which simplifies and miniaturizes the composting process. Many people compost in their backyards, but many more cannot due to lack of space, unfavorable weather, physical handicaps, or just lack of time and energy. We automate and simplify the whole process, such that anyone can do it in the comfort of their kitchen. The Cabinet Kit is an essential addition to every kitchen making composting effortless.

The Cabinet Kit is in stock and available exclusively at Williams-Sonoma. More information about the Cabinet Kit can be found at www.naturemill.com

At just \$99, the Cabinet Kit is designed to be compatible with the NatureMill Plus and PRO composters allowing them to conveniently slide out of the cabinet, and be safely stowed away from children and pets.

About NatureMill, Inc.

Founded in 2004 in San Francisco, NatureMill is devoted to making compost easy and accessible to everyone. NatureMill composters have been sold in 27 countries, and are busy diverting four thousand tons of waste from landfills worldwide.
